EXPERIENCE

Full Stack Developer (Backend-Focused) — Zoho, Integrations & AI Automation
Fairchance for CRM, Lahore, Pakistan · Aug 2025 – Present

Zoho CRM & Ecosystem

- Delivered end-to-end Zoho CRM customization for clients: custom modules with custom fields, workflows, Deluge functions, dashboards and reports
- Built CRM extensions for complete CRM customization beyond standard configuration

- Developed Zoho Creator apps and widgets, and configured Zoho Desk, Books, SalesIQ, Analytics and Catalyst for client needs

Integrations & Automation

- Built multiple Zoho Flow projects, including a two-way sync between Zoho and a client's Oracle database, with webhooks and third-party integrations
- Connected a client's Oracle ERP environment to Zoho using Zoho Flow and Deluge
- Integrated Zoho with other applications and local environments through APIs, webhooks and built-in connectors

AI, MCP & Agents

- Connected Zoho MCP to Claude and ChatGPT so AI assistants can create custom modules and fields, add workflows and functions, and build dashboards and reports in Zoho
- Built scheduled AI automations, e.g. when a Zoho Desk ticket is created, Claude inspects it, checks the related customer and gathers the relevant details
- Built Zoho Agents that use MCP for automated, tool-driven workflows
- Deployed Qwen2.5-3B on a client's own server and built flows on it to answer queries about the client's application
- Built a call-recording pipeline: Whisper (medium) transcribes calls, an LLM (Qwen, later Gemini) generates summaries and call notes, and the notes are written back to Zoho CRM automatically

Backend Engineering

- Architected the backend of Agent Desk CRM (MERN), integrating Zoho CRM APIs for real-time data sync and workflow automation
- Designed REST APIs with JWT authentication and role-based access control
- Implemented webhook-based automation to sync data between internal systems and external CRMs
